

You define the strategy. We analyse it.

Operations: Economics & Strategy Class, Autumn 2018, EPFL

This semester Deloitte is sponsoring the Operations: Economics & Strategy class. The best project will be awarded the 6th Deloitte OES Prize courtesy of Deloitte Consulting.

The project is an integral part of the course and complements the course material. It should be carried out in teams of two or three students. Each team should submit a report of at most 15 pages. Specifically, the project should analyse how supply chain management has changed or could change by innovative use of information technology. In addition, the team should analyse how sustainable any competitive advantage derived from such supply-chain innovation is likely to be.

The teams will present their work in front of a panel composed of Prof. Weber and Deloitte Consultants at the end of the course.

The winning team will be announced in the class on 12th of December 2018.

What impact will you make?
